

Advanced Internet of Things Technologies course

Designed by: Thuat NGUYEN-KHANH

Lecturer at The Faculty of Computer Networks &
Communications - UIT - VNU-HCM

Email: thuatnk@uit.edu.vn

Project Instruction

Designed by: Thuat NGUYEN-KHANH

Lecturer at The Faculty of Computer Networks &
Communications - UIT - VNU-HCM

Email: thuatnk@uit.edu.vn

1.1 Topics

1.2 Grade/Score Components

1.3 Reports

1.4 No. groups/Members per group

1.5 Introduction to UiTiOt Research Group

1.1 Topics

- IoT solutions/apps
 - Smart home, Smart city, Smart Agriculture, ...
- IoT protocol
 - Zigbee, BLE, LoRa, 5G, ...
- IoT Hardware
 - IoT OEM
- IoT Big Data
- Artificial Intelligence in IoT
- ...

1.1 Topics

- You can choose anything you like in IoT, but you must discuss it with lecturers before registration.

1.2 Grade

- 20%: Report (Word) + Slides (PPT)
- 60%: Performance Presentation
- 20%: Attendance to other Presentations & Q&As.

1.3 Report

○ Types

- Technical Report (Word)
- Slides (PPT)
- Demo logs/video/scenarios/results
- Numerical data

○ Structure of Report

- Full details of author(s): Full name, StudentID
- Introduction
- Description of topics
- Code analysis/Demonstration
- Related work
- References

1.4 No. groups/Members per Group

- No. groups
 - 6 [total students: 12]
- Members per Group: 2

1.5 Introduction to UiTiOt Research Group

- Home page: <https://iot.uit.edu.vn>
- Mentor by Assoc. Prof. Quan Le-Trung
 - Dean of Faculty of Computer Networks & Communications
- Senior members:
 - MSc. Thuat Nguyen-Khanh (thuatnk@uit.edu.vn)
 - MSc. Chuong Dang-Le-Bao
 - MSc. Tuan Le-Anh
 - MSc. Binh Bui-Thanh
 - BSc. Luan Van-Thien
 - BSc. Bao Nguyen-Van
 - BSc. Phat Phan-Trung

1.5 Introduction to UiTiOt Research Group

- E3.1 Lab
- Practice/Experiment/Research Devices
 - IoT development Kit: Arduino, Raspberry PI 3, TelosB, MicaZ, Beagle Bone, Jetson Nano, Orange PI, ...
 - Hạ tầng mạng không dây thế hệ mới (3G/4G/5G), SDN/NFV/CDN, software defined radios, femtocells, và thiết bị đo, phân tích
 - UIT OpenStack Cloud
 - Các thiết bị phục vụ thiết kế OEM, chế tạo thiết bị IoTs/Industry4.0, giải pháp cứng hóa phần mềm để tăng tốc độ xử lý
 - Các thiết bị phục vụ nghiên cứu phát triển ứng dụng IoTs/Industry4.0
 - và giải pháp IoTs/Industry4.0 thông minh

Thank you!
